Prof. N. Mathivanan also talked about herbal therapy is still under extensive practice in many ethnic cultures and about 80% of the global population is using herbal medicines. These challenges can be overcome by way of scientific research and development, which will eventually lead to discovery of plant-based natural drugs and or herbal preparations for the treatment of human diseases and disorders. In recent times, importance of herbal medicines has been amply highlighted due to Covid-19 pandemic as our Indian traditional medicines are being widely used by common public as preventive or therapeutic options.
